Quickly learns new tools and technologies.

Language

- **English:** Advance
- **Malay:** Advance
- **Tamil:** Native

About Me

I'm a Year 3 Computer Science student majoring in Intelligent Computing, seeking an internship to apply my technical skills and gain hands-on experience. My background in coding, machine learning, and web application development has prepared me to contribute effectively to real-world projects.

Projects

Leafy - Company Website

HTML, CSS, JavaScript (Node.js, React.js)

A responsive website for Leafy, showcasing plants, services, and the team.

3D Gasket Animation

JavaScript, HTML, CSS

A 3D animation tool featuring gasket transformations with rotations, scaling, translations, color transitions, and customizable user controls.

Cervical Cancer Prediction

Python

A machine learning project predicting cervical cancer risk using K-Nearest Neighbors and Decision Trees.

For more projects and info, check out my [portfolio](#) or [GitHub](#).
